Hi,

The layout for the offer 06-3515 is enclosed, please check if the offer is exactly as you wanted.

Best,  
Rebane

Hi,

Thanks for the images, I think I understand now.

Also, yesterday our organisation made the decision to go with your company for printing our songbook, so we will take you up on the offer you sent us. How do we proceed now? I still have some small changes I need to make to the PDF file before I send it to you. You also mentioned a cover layout file, if you send me that I could start designing the cover.

Hi,

If I understand correctly the PDF need to be in PDFX1a format. I can use acrobat to do the conversion, it shouldn't be a problem.

However, I am a bit unsure what a print-ready pdf looks like. Since A6 is 148mm by 105mm, I should adjust the paper size to 151mm by 105 mm, and then add 3mm to all margins before adding the trim lines? Are the trim marks in the image I attached ok? Do you need trim marks on every page?

Could you by any chance send me an example of what a print-ready PDF should look like? Alternatively, do you provide the service of making the necessary adjustments? If so, how much do you charge?

Hey, the inlay I have calculated in digital print, in black, but we still need bleeds for cutting etc. Please see the instructional url I added previously, it is much more thorough than me.

The cover board is 2mm right now, but it can be thicker if you want to change it (up to 3mm), 2mm usually suffices.

Hi,

Oh I see, I think I misunderstood. A pink printed cover is fine, it does not have to be actual pink paper.

Also, how thick will the cover be? And do I need to take bleed into account in the PDF if there is no color (just white background) extending to the edge of the page anywhere in the book? The edges of all pages are similar to the ones in the attached image.

Good day Robin!

Those are technicals:

8 pages (4+4pg) of endpaper are added to the block to connect it with the covers, often they are also printed. The first page is fully glued to the front cover board, and the last page is glued to the back cover board.

4 pages of cover, of which 2 pages can be printed, as the reverse side is glued to the cover board. The cover file is always made as a layout, as it also needs to contain the spine. If you place an order I will give you the cover layout file that has all the exact measurements.

Please also see the tips here (fin/se/no also available):

<https://www.printon.ee/en/nouded-failidele/>

If you would have colored paper, printed with black only, on the cover, then the total would be +316 euros added to the first offer. I calculated that with PopSet Cosmo Pink <https://arjowigginscreativepapers.com/en/catalog/popset/popset/>, that seems to me the closest to the picture you sent me, but if you choose another colored paper, then the price will change of course.

My first offer had the cover printed pink by cmyk, but the colored paper will of course be more unite, and will have no different shading what so ever.

Please let me now if there are any more questions, or if I left anything unclear.

Best,  
Rebane

Teema: Re: Song book

Hi,

What does "8 page ends" and "4 page cover" mean?

Also, how much more expensive is a coloured cover? We would like to have a pink hardcover, with our logo and the word "Sångbok" printed on it, as in the picture attached. (It is our previous songbook, which did not have a hard cover and had some trouble holding together with heavy use). I can send the logo in vector format. The typeface for the word "Sångbok" should be Times New Roman, and the layout should be as in the image.

Good day Robin!

Here is the offer enclosed.

I made a digi print offer for you, as this is the perfect volume for it. I also printed the cover for cost reduction, there is also the possibility to have colored paper on the cover, but it is significantly more expensive.

Please let me know, if you have any questions, or need me to make any changes.
