Hi.

I expected that you were making the files, no worries.
The best way is www.wetransfer.com, it's free.
Just send the files, and my repro will take a look, and tell us if anything needs to be changed or not.

I need the company name, address, billing address, representatives name, Vat nr(if there is), you can add a phone nr. That should suffice.

Best,
Rebane

Hi,

I was waiting for the last picture to be included in our book to be finished, so that is why I was quiet for a while. The PDF is now finished, although it is too large to attach to this email (~43MB). The trim box is 15mm from the edge, is this ok? I have used LaTeX for the pdf and then added trim marks with Acrobat, as I don't own InDesign. How do I send you the file?

I also finished designing the cover, here it is with measurements as in the layout file (272.7mm x 190mm). (The text on the spine of the book should be centered, and the logo is centered on the front cover).
Do you need bleed and margins on this file as well? In that case I can add it.

What information do you need from our organisation for the invoice?

Best Regards,
Robin

Hi,

Upon closer inspection I noticed that the measurements in the cover layout file don't quite add up. At the top it says the width is 272.7mm and the height is 190mm, however, when adding up the measurements I get the width to $(16+100+9+18.7+9+100+16)=268.7\text{mm}$ and the height to $(16+154+16)=186\text{mm}$, each 4mm short.

Is this because the foldover should actually be 18mm, and 2mm of that is to cover the thickness of the board? In that case, the visible cover should be 18mm in from all the edges?

Br, Robin
